Foster High School  
4400 FM 723  
Richmond, Texas 77406

Dear Parents:

## **My Promise to You**

Thank you for the opportunity to work with your child! Let me begin by saying that this class is unique. I constantly work to provide the best learning experience for my students. I take it as a personal challenge to see that your child becomes the best student and person they can possibly become. I promise to do my best to teach, motivate, encourage and care for your child as I would my own. I am here because I choose to be here and I am driven to see your child experience success.

## **Become Familiar with our Website!**

I have designed an incredibly user-friendly website to keep parents and students posted on all things related to my classes. If there is one single tool to become familiar with in my class, this is it! I update the website almost daily with new information, links, and exam reviews. In the past I have made grades available online through the website, but we have changed grade systems this year. We have been told that you will be able to access grades online with our new system, but we have not been given login information as of the time of this publication. I'll keep you posted!

## **Safety**

Strong emphasis is given to safety in the lab. Due to the nature of the class, some projects may require work to be completed with small hand and power tools. Each student will receive instruction and must demonstrate ability to operate such equipment before given permission to use certain tools on projects. No student will operate any machine (portable or stationary) or use any hand tool within the lab without having on file a completed emergency form.

## **Project Costs**

This class offers the student the opportunity to learn the CAD software as well as learn hands-on techniques for project and model development. Through this semester, your child will be given the chance to construct models such as catapults or C02 cars. Students may choose to bring their own required materials, purchase materials from the instructor OR they may choose to complete a related alternate assignment that requires no materials or construction.

I thank you again for the opportunity to work with your child. I strongly encourage and request parent involvement and contact during the year. I gladly keep parents posted on student progress and any concerns that may arise. I believe the students at Foster High School are the best and I love to brag on them. If you have any questions or concerns, please contact me through the school office at (832) 223-3800 or by email at [jamurphy@liscisd.org](mailto:jamurphy@liscisd.org). Up-to-date information can be found on our website at [www.fostercad.com](http://www.fostercad.com). I look forward to hearing from you soon.

Sincerely,

Jared Murphy
